FOUNDATIONAL THERAPIES

COLD THERAPY

This Perform therapy harnesses the invigorating power of extreme cold temperatures to stimulate the natural release of anti-inflammatory proteins and endorphins, to promote a host of benefits for your body and mind.

COMPRESSION THERAPY

This Perform therapy utilizes specially designed garments with pneumatic pumps to apply external pressure, helping to alleviate symptoms of venous insufficiency, reduce swelling, and accelerate muscle recovery after exercise.

RED LIGHT THERAPY

This Live therapy, also known as photobiomodulation, penetrates the skin's surface to activate mitochondrial function. Regular sessions can enhance tissue repair, reduce inflammation, and boost collagen production.

PEMF THERAPY

This Live therapy utilizes low-frequency electromagnetic waves to promote cellular function. By stimulating the body's natural healing processes, PEMF therapy can help reduce inflammation and accelerate tissue repair.

HEAT THERAPY

This Glow therapy enhances circulation, stimulates detoxification, and alleviates muscle tension by increasing the body's core temperature. Regular sessions can improve sleep quality and strengthen your immune system.

SALT THERAPY

This Glow therapy, also known as Halotherapy, utilizes micro-particles of salt to cleanse your respiratory system and soothe skin ailments, while simultaneously providing stress relief for your mind and body.
